# 2015 HHS Climate Justice Conference

June 8-9, 2015 • Research Triangle Park, North Carolina

*Climate change is having and will continue to have significant impacts on people's health, in particular those who are already disproportionately impacted by environmental hazards and social conditions. HHS is hosting a one and a half day conference to discuss the challenges, current HHS climate change related activities, and possible resources and tools.*

## Conference Goal

Explore public health issues and strategies related to climate change for disadvantaged populations.

**Registration is on a first come, first served basis and will close on May 29.**

## Who Should Attend?

- Federal, state and local government officials
- Community organizations and individuals
- Healthcare providers
- Researchers
- Anyone interested in climate change and environmental justice!

## Breakout Tracks

- Policy Development and Dissemination
- Education and Training
- Research and Data Collection, Analysis, and Utilization
- Services

## Conference Speakers will

- Describe how public health and occupational exposures are compounding vulnerability to climate change hazards in low-income and disadvantaged communities.
- Describe how communities can effectively engage in climate change and health research and adaptation planning using new resources and tools designed to help communities become more resilient and better protect themselves from the impacts of climate change.

**Registration for this FREE meeting is now available.**
