Climate change and preventive medicine

Author(s): Faergeman O
Year: 2007

Source: http://dx.doi.org/10.1097/HJR.0b013e3282f30097

Resource Description

Cross-cutting Themes: Mitigation, Health Sector Influence

Exposure: weather or climate related pathway by which climate change affects health

Ecosystem Change, Extreme Weather-Related Event/Weather-Related Disaster, Food Quality, Food Security, Sea Level Rise, Temperature

- **Extreme Weather-Related Event/Weather-Related Disaster:** Flood, Hurricane/Cyclone, Wildfire
- **Food Quality:** Nutritional quality
- **Food Security:** Livestock Productivity, Food access/distribution
- **Temperature:** Heat, Variability

Geographic Feature: resource focuses on specific type of geography

- General

Geographic Location: resource focuses on specific location

- Global or Unspecified Location

Health Impact: specification of health effect or disease related to climate change exposure

- Cancer, Cardiovascular Impact, Diabetes/Obesity, Infectious Disease, Mental Health and Well-Being/Stress, Morbidity/Mortality

- **Cardiovascular Impact:** Other Cardiovascular Impact, Specify
Cardiovascular Disease (other): Coronary Artery Disease

Infectious Disease: General Infectious Disease, Vectorborne Disease

Vectorborne Disease: Mosquito-borne Disease

Mosquito-borne Disease: Dengue, Malaria

Mental Health and Well-Being / Stress: Other Mental Disorder, Specify

Model/Methodology: type of model used or methodology development is a focus of resource

Exposure Change Prediction

Resource Type: format or standard characteristic of resource

Commentary/Opinion

Adaptation: Secondary Health Impacts of Adaptation

Mitigation: Secondary Health Impacts of Mitigation

Timescale: Long-Term (>10 years)
