	Naive	119	0	0	62	15	2	0	40	0	119	1.000

¹Uncensored subjects include those that were moribund, dead, or missing.

²Censored subjects include those that reached terminal sacrifice, surplus, discard, or reallocation..

Table 2. Cox ¹ Proportional Hazards Analysis for Comparisons to Vehicle Controls					
Sex	Set ²	Dose (µg/kg)	Hazard Ratio ³	P-Value	Adjusted P-Value ⁴
F	1	2.5	0.22	0.055	0.330
		8	0.47	0.264	0.520
		25	0.12	0.043	0.299

	4	Naive	0.08	0.013	0.013

¹A modified Cox proportional hazards model was used to test for group differences.

²Pairwise comparisons of the low dose BPA groups (Set 1 with BPA<100,000µg/kg) were adjusted using Holm's adjustment for seven comparisons. Comparisons of high-dose BPA groups, EE₂ group, to vehicle are adjusted for two comparisons.

³Hazard ratios relative to vehicle control.

⁴Holm's adjusted "p-value"
