<b>Total</b>	<b>82.5</b>	<b>87.2</b>	<b>83.9</b>	<b>86.8</b>	<b>85.1</b>	<b>2.3</b>

<sup>a</sup> Mean and SD for four animals.

<sup>b</sup> Includes urine present in bladder at time of sacrifice.

<sup>c</sup> Tissue weight for blood was calculated based on 7.4% of body weight.

<sup>d</sup> For adipose, skin, muscle, and plasma, the percent of dose presented is that found in the measured aliquots and not the whole tissue.

The percent of dose remaining in these tissues is primarily accounted for in the percent of dose in carcass digest. Tissue weights for dispersed tissues were calculated based on body weight as follows: adipose 7.0%, muscle 40.4%, skin 19%, blood 7.4%, and plasma 4.3%.

<sup>e</sup> Includes cage rinse and urine present in bladder at time of sacrifice.

N.S. means no sample.
