Exploring nonlinear association between prenatal methylmercury exposure from fish consumption and child development.

Prenatal exposure to methylmercury and child development: influence of social factors.

Using measurement error models to assess effects of prenatal and postnatal methylmercury exposure in Seychellois children.

Association between methylmercury exposure from fish consumption and child development at five and a half years.

Neurodevelopmental outcomes of Seychellois children from the pilot cohort at 108 months following prenatal exposure.

Twenty-seven years studying the human neurotoxicity of methylmercury exposure.

Association between prenatal exposure to methylmercury and developmental outcomes in Seychellois children.

Effects of prenatal and postnatal methylmercury exposure from fish consumption on neurodevelopment: comparison with baseline.

Semiparametric modeling of age at achieving developmental milestones after prenatal exposure to methylmercury.
