# Laborers-AGC's Brownfield Program Minority Worker Training Progam

Myra Blakely

### History of the Program

The Brownfields Job Training Pilot program was launched in 1998, under the authority of Section 311(b) of CERCLA.

# Program

 Training funded under this authority must be in the handling and removal of hazardous substances related to the implementation of alternative or innovative treatment technologies.

#### Program - continued

- Pilots are funded up to \$200,000 for up to two years. Pilots must be located within or near a Brownfields Assessment Demonstration Pilot.
- Eligible entities include: non-profit training organizations, colleges, universities, States, counties, municipalities, Federally recognized Indian Tribes, and US Territories.

## Program Currently

- EPA has awarded 37 pilots to date. Pilots are located in all of the 10 EPA Regions.
- An additional 9 pilots will be awarded in FY01.

 Pilot objectives include: providing environmental training for residents of communities affected by brownfields, and facilitating cleanup of brownfields sites.

# Program Currently

Pilots focus on ensuring that local communities share in short and longterm benefits of brownfields cleanup efforts and enables unemployed or underemployed residents to find sustainable employment in the environmental field.

# Employment

Average unemployment rate of target areas is over 14%.

 Based on pilot quarterly reports submitted earlier this year, over 468 graduates are employed in the environmental field at an average entry level salary of \$12.

# Training

- Training cycles vary in length from 40-hour OSHA certification to 12-24 month associate degree programs.
- Leveraged funds are providing support services such as transportation, day care, life skills, job readiness and educational enhancement. (Workforce Investment Boards, YouthBuild, Foundations, NIEHS)

#### Partners

Partners include: local training organizations, private sector and foundations. Information sources: Epa.gov/brownfields Hud.gov Dol.gov Nawb.org
